AND Technical
Education**

*Strengthening the
profession by supporting
professionals . . . like you.*

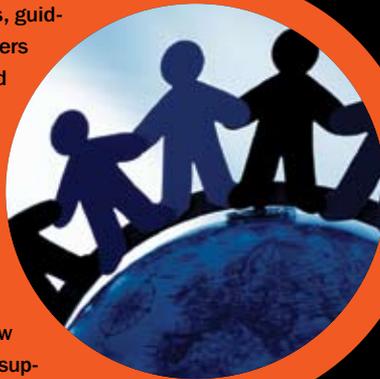

THE ASSOCIATION FOR CAREER AND TECHNICAL EDUCATION (ACTE) is a diverse organization of more than 30,000 career and technical educators, administrators, researchers, guidance counselors and others involved in planning and conducting career and technical education (CTE) programs at all levels of education.

From professionals at the peak of their careers to individuals who are new to the profession, ACTE supports career and technical educators at all levels of responsibility.

ACTE caters to the needs of its members by providing resources, tools and networking opportunities that they need to help students succeed.

Members of ACTE share an interest in enhancing their professional skills and supporting each other. Furthermore, ACTE members have a vested interest in the vitality of the profession.

The care that ACTE members receive from ACTE not only strengthens them as individuals, but helps support the entire profession. As educators join ACTE to gain the professional benefits of membership, the organization becomes a stronger, more effectual force in gaining support for the profession.

Who We Are

ACTE is the largest national education association dedicated to the advancement of education that prepares youth and adults for successful careers.

What We Do

ACTE is committed to enhancing the job performance and satisfaction of its members; increasing public awareness and appreciation for career and technical programs; and assuring growth in local, state and federal funding for these programs by communicating and working with legislators and government leaders.

Meeting Your Professional Needs
